Subject Alaska Pebble Mine

To whom it may concern,

I feel it would be irresponsible to allow the Pebble Mine to be built. Even though the listed chance of failure is 1 in 10,000 or 1 in 1,000,000 is not something that should be allowed as that one chance is still too high for the waterway, the fish, and the native people that live within the area. I am a fisherman and an outdoor enthusiast and cannot sit by without saying or writing in regards to this issue. I live in Pennsylvania and we are dealing with the latest Fracking for natural gas and it feels like our politicians are in the pocket of oil companies, especially our governor. I am speaking out again on this issue on behalf of all people, fish, and other wildlife from the area and hopefully you will listen and take a stance against the Pebble Mine. I have donated to the effort to ban the mine and will continue to protect any effort to build within such a sensitive area. Please do not allow this to happen.

Thanks,

James W. Frey
